Layered

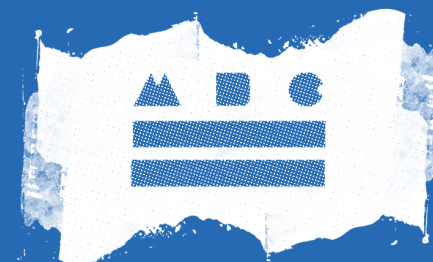

new work by michael crossett

Reception
Oct. 2nd 5-7 pm

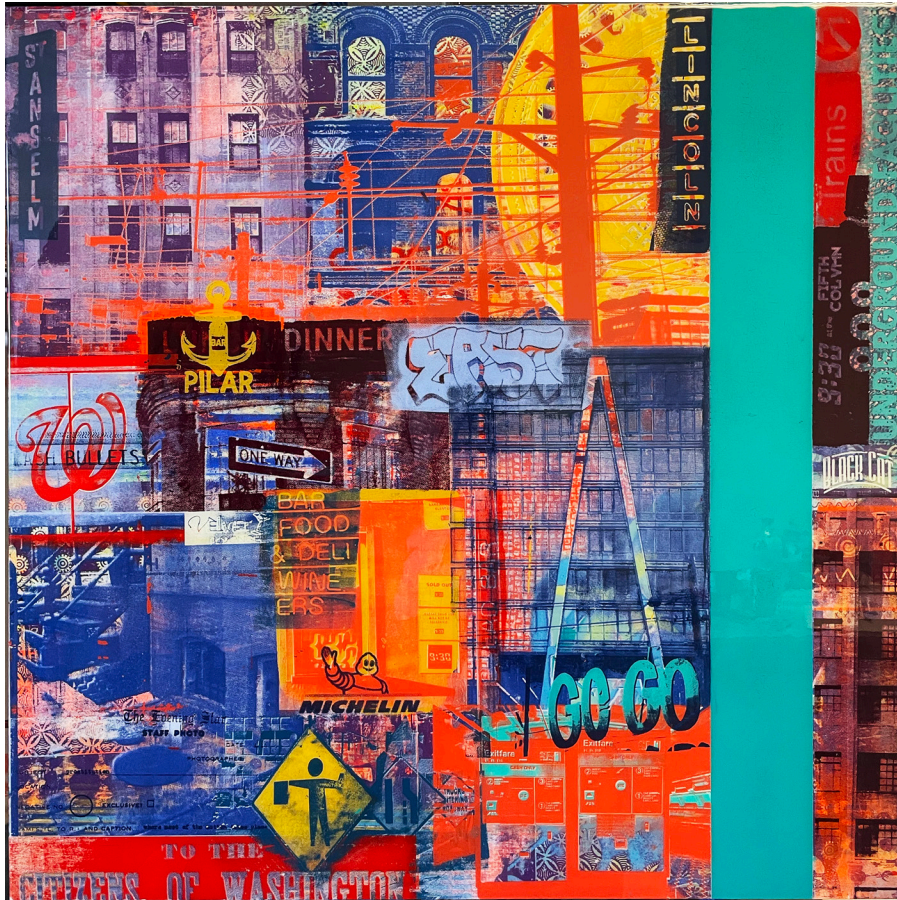

ARTIST STATEMENT

Layered presents a new series of layered, acrylic screen printed works on wood, canvas and paper by district native Michael Crossett. This complex body of work focuses on using the print medium to convey the texture, culture and bustle of city life. By meticulously hand-pulling silk screen collages of urban grit, photographs and graphic elements, he creates an interplay of imagery and color that evokes both a nostalgic and fresh perspective. Many of the pieces created for the series are more abstract than previous work, here, he focuses on building the same aesthetic thru the color blocking and half toned textures.

‘I am fascinated with the spontaneity and freedom screen printing allows. In my eyes, technical methods and details are merely a means to an end, while the true beauty of the process lies in the spontaneous and gradual development of a composition, layer by layer.’
